HeadLine: Building Technology that builds companies

SubHeadLine:

Trusted infrastructure that handles the code so you can focus on growth

Body:

Miomir solves for correctness, In the Age of Ai where the friction to write code is easier than reading , Miomir Provides a framework that has been tested and solves for correctness. Stop spending cycles on infrastructure. We give you enterprise-grade security, speed, and scalability from day one. What you get: faster time-to-market, lower costs, and complete control over the customer experience. Our job is to build. Your job is to grow.

Miomir lets You Focus on growth Not Code, and Developers focused on building their core products

Slew of Products with api integration ready to go:

1. Prager Messenger: Messaging built for work. Chat, video, and productivity tools without Slack's noise. Build your custom workflows on a framework you control

2. Prai: Productivity AI that speaks your user's language. Trained on Pidgin and English, it understands what generic assistants miss.Understanding business context and can be scaled based on use.
